For companies of any size the most sacred of tenets is to not to waste valuable resources. Yet, many businesses grapple with this very thing when it comes to their sales, marketing and online brand presence. Frequently companies both large and small, become stagnant attempting to follow old face to face sales and marketing practices while completely ignoring that the landscape is now digitally driven.

Add to this a new breed of team members who while retaining book knowledge of the basics in business, often are at a loss with the etiquettes of networking and application to a simple sales funnel. Business owners are left at a loss, sales teams are frustrated and some companies, well...fold.
